

Study On Air Layering Of *Psidium Guajava* L.

Soe Soe Nwe *

Abstract

The air layering of *Psidium guajava* L. (Guava) was studied at Kan-ka-lay orchard, Mudon Township, Mon State. In this paper, the information and data were collected on the air layering sites of Guava. Scientific classification, origin and distribution and variety and morphological description, were described with the help of the most recent literature. The air layering of Guava was emphasized by using of practical study and literature. Air layering method, seed sowing and transplanting for rootstock, selection of mature plant, preparation for layering equipment, preparation for root emergence and field planting were also described. Flowering and fruiting periods are presented. The step by step of air layering method of Guava are also presented by taking photographs.

Key word: morphological, transplanting, layering method.
